Easy DIY weekend projects

Sprucing up your home's interior in one quick-and-easy project at a time!

☐ **Upgrade cabinets** – Refresh with a coat of paint, new knobs or hardware to personalize and modernize your home's interior.

☐ **Dress up entryway** – Add potted plants, outdoor seating and a welcome mat. Maybe paint the front door a bright color and switch out the handle set and deadbolt for an upgrade.

☐ **Add storage** – Assemble organizers in your drawers, cabinets and closets. Consider installing paneling or wall cabinets in the garage.

☐ **Outfit windows with siding** – Add decorative aesthetic-only shutters to your home's exterior to pump up the look and add an accent color.

☐ **Start a vegetable garden** – Plant vegetables in raised planter boxes to keep the yard neat and plants damage free.

☐ **Paint a room** – Give your house variation with a pop of color and a fresh new atmosphere.

☐ **Declutter your home** – Discard the messes on desks, tables, chairs, and drawers as the typical culprits for excess clutter. Use trash bags for junk items and a box to collect donation items.

☐ **Repair your bathroom** – Chip away old caulking and add a fresh lining in your bathtub and shower to achieve a clean look complete with new curtains.
