

10 quick and easy kitchen updates

Add new life to your kitchen with these easy updates:

1. **Paint an unused cabinet surface with chalkboard paint.** Spice up a wooden cabinet surface to help with grocery lists, family to-do lists or just as a space for your kids to be creative while you cook. (Look for handy chalkboard markers!)
2. **Paint cabinets an accent color.** Cabinets don't have to be white or brown. Go bold with a bright blue or sunny yellow. Cool colors make a room feel bigger, warm colors make a room feel cozier.
3. **Add new hardware to your cabinets.** Don't want to paint? Just replace the hardware. A decorative pull can add sophistication or a little quirkiness to your kitchen.
4. **Keep a kitchen herb garden.** Many big-box and hardware stores sell kitchen herb planters for a windowsill.
5. **Install a pull-out shelf.** Expand the space underneath your kitchen sink or make it easier to reach pots and pans in your bigger cabinets.
6. **Add shelves for more storage space.** Cabinets aren't the only way to get more space. Display your plates and glassware on some sturdy shelves and brackets.
7. **Install a water purification system under your sink.** Tap water doesn't cut it for you? Install a purification system right under your sink and get rid of hard water or plastic water bottles.
8. **Get a kitchen cart.** Tapped for storage, but don't want to install right into the wall? A kitchen cart doubles as another prep surface and storage.
9. **Buy tiered racks to expand your storage space vertically.** Add more spice(s) to your life! A removable rack doesn't involve any installation and instantly adds extra tiers to your cabinet storage.
10. **Add a backsplash accent.** Splurge on high-quality tiles for a small space — easy on the wallet and the eyes.
