

Health precautions when marketing your home

Are you thinking about selling your home, but cautious to keep your family healthy?

Here is a checklist to use to keep your home hygienic while opening your home for showings:

- ☑ Clean high-touch surfaces, including light switches, interior and exterior doorknobs, lockboxes, cabinets and countertops with disinfecting wipes or spray.
- ☑ Leave interior doors open to minimize touching of doorknobs.
- ☑ Open windows before and after showings to introduce fresh air into the home.
- ☑ Require all agents and potential homebuyers to use hand sanitizer before touring the home.
- ☑ Be flexible with show times and rescheduling so agents and clients don't feel pressure to arrive despite an illness.

Your agent can take steps for your peace of mind. These include shooting virtual tours or providing property and marketing information to buyers online.
